PREFACE

This part of the Mission Coverage Index (MCI) furnishes a listing of intelligence targets covered by all but the high priority passes on Mission 9038.* Items in the listing are arranged (1) by country, (2) by WAC area within the country, and (3) by coordinates reading from south to north and from west to east. For items which also appeared on high priority passes and were described in Part I of the MCI, a photo reference only is given in Part II unless additional information could be given. An explanation of column headings and photo reference data used in presenting the information is contained in the appendix.

For the convenience of the user, a subject index to the intelligence targets has been included following the listing. Targets in the subject index are listed (1) by category, (2) by country within each category, and (3) alphabetically by place name within each country.

The user of this MCI is cautioned that the scan of photography from Mission 9038 was accomplished in a relatively short time and often without the aid of precise analytical and mensural equipment commonly employed in detailed photographic analysis. Consequently, although the information presented herein is essentially accurate, future detailed analysis may somewhat alter portions of the information.

*Targets covered by high priority passes will be found in NPIC/R-140/62, MCI-Part I, Mission 9038, October 1962.

SUMMARY
MISSION 9038 Part II

25X1 [REDACTED] Mission 9038, accomplished during the period 28 June through 2 July, provided [REDACTED] photographic passes over the Sino-Soviet bloc. Utilization of a forward and an aft camera provided stereoscopic coverage. Approximately 55 percent of the coverage is cloud free.

The average scale of photography at the center of the format ranges from approximately 1:477,000 at 70 degrees north to 1:366,000 at 35 degrees north for descending passes, and 1:649,000 at 70 degrees north to 1:920,000 at 35 degrees north for the ascending passes.

This portion of the MCI covers the 28 passes [REDACTED],

25X1

[REDACTED]
Installations of special interest identified for the first time on this mission and included in this part of the MCI are the ICBM launch complexes at Kozel'sk (see also Part I of the MCI) and Novosibirsk, [REDACTED] a possible anti-missile missile launch area, two MRBM launch sites, three SAM support facilities, one SA-3 SAM site, one new-type SAM site, eighteen SA-2 SAM sites, and four SA-2 SAM sites reported as newly identified on Mission [REDACTED] OAK but also seen on this mission.

APPENDIX
EXPLANATION OF COLUMN HEADINGS
AND PHOTO REFERENCES

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. The city and installation names are followed by a capsule description, where appropriate. Distances to installations from referenced cities are determined from the center of the cities.

Coordinates -- Coordinates for all installations are for the minute square in which the reference point is located. Where the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers -- The Installation Numbers column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target numbered 0153-1 and an NPIC target numbered 0154-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

TOP SECRET

25X1

TOP SECRET

NPIC/R-153/62

The photo reference provides the ascending and/or descending pass(es) and forward and/or aft frames(s) on which the target appears, and indicates conditions which affect interpretation of the target. The reference also provides Universal Reference Grid (X-Y) coordinates to aid in pinpointing the target on the photography. These grid coordinates follow the frame to which they apply.
